

**Application submission for connecting the property to the sewage network:**

**Required documents:**

- Organizational sketch.
- Land sketch.
- Property ownership document.
- Works permit or building permit.
- ID copy.
- Authorized authorization by the bank for the person or agency in case he or she is not present in person or near the first degree.
- The consent of the neighbor according to the model in case of passage from his land.

**Place of service:**

- Customer service offices

**Fees:**

- Determined after detection.

**Procedures:**

- When you attend the service office, the employee will prepare the transaction form for you to sign.
- A check card will be provided to follow up on your transaction.
- The company employee will visit the site to reveal the field and prepare the technical study of how to connect the property to the sewage network.

**Notes:**

- Based on the technical study if the sewer line will pass the land of your neighbor must be present personally and sign the neighbor's consent form to complete the transaction.
- Within 3 days, another staff member will visit the site to determine the fees required to complete the receipt.
- It is necessary to choose a contractor from the list of contractors approved by the company to implement the receipt based on the technical study issued by the company with the signing of the agreement approved by the company Fundamental.
- You will then inquire about the progress of the transaction through:
  - Contact with the number on the review card 0000000000000000
  - or through the company's website [www.miyahuna.com.jo](http://www.miyahuna.com.jo)

When your transaction is ready to pay the fees, you must check with the Customer Service Office Ras Al-Ain Branch (the contractor's agreement with you chosen) to pay the due fees and inform the contractor substantively.
